

INTRODUCING THE **FIRST** MICROSOFT OFFICE COMMUNICATIONS SERVER (OCS) **APPLIANCE**

Give your company the power of unified communications today!

OCS brings all forms of business communications together into a single system that focuses on the user. Tele-Communication, Inc. offers a variety of scalable StartReady UC Appliances based on the size of the implementation, number of locations, and requirement for integration with the existing PBX phone systems. StartReady UC appliances support between 25 and 1,000 users, and appliances can be grouped for scalability. The UC Enterprise Appliance allows for a quick and easy deployment of Microsoft Office Communications Server (OCS).

Experience the benefits of OCS

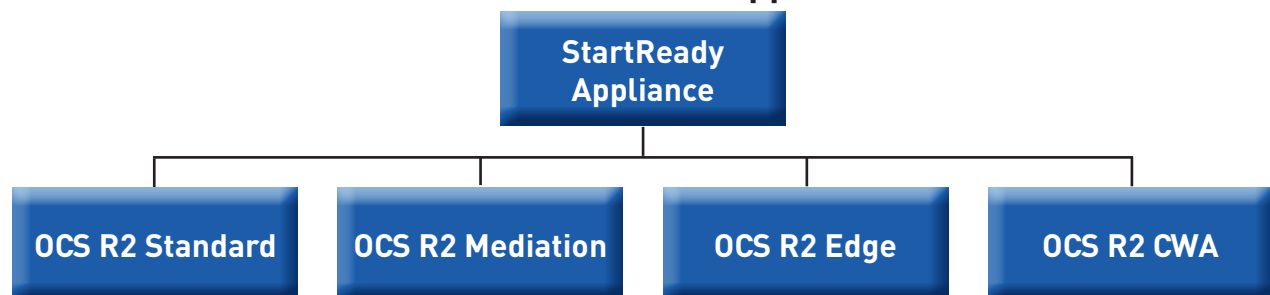

- Instant Messaging
- Voice Calling through VoIP or PSTN
- Video Calling
- IM and Voice Conferencing
- Integrated LiveMeeting
- Presence Indication
- Ability to Federate (connect) to Other Companies
- Full Phone System Capabilities (hunt groups, least cost routing, dial plan, auto attendant, IVR, CDR)
- Exchange & Outlook Integration
- Desktop Sharing
- Video Chat
- Secure, Encrypted Certificate-Based Communications

We make it simple

Traditionally, deploying OCS involves a major time commitment, the purchase of multiple servers, and either extensive outside consulting services or a steep learning curve for internal IT staff. By purchasing the StartReady UC appliance through Tele-Communication, Inc., companies can deploy OCS in a matter of 2-3 days on one managed, menu-driven appliance that runs all Microsoft Office Communications Server roles. This ready-to-use solution unites hardware, software and the underlying Microsoft licenses in a single, 1U rack-mountable device.

4 Server Roles in 1 Appliance

UNIFIED COMMUNICATIONS MADE EASY TO **PILOT AND TEST**

Access the full range of OCS features for 45 days

With Unified Communications, organizations can use multiple channels of communication and switch seamlessly between them. Many companies already profit from the benefits UC can offer. Personal productivity increases, business processes gain efficiency, long-distance collaboration becomes easier and costs are considerably reduced. The best way to demonstrate these improvements is by allowing companies to fully experience what the StartReady UC Appliance can do. The OCS Pilot Program gives companies access to the full range of OCS features, such as Edge, Enterprise Voice telephony, video conferencing, remote access, LiveMeeting, Outlook integration, and more.

Program Features

- StartReady UC Appliance
- 25 users enabled
- 5 Polycom desk phones
- 5 Plantronics headsets
- Microsoft Office Communicator Clients (MOC)
- Telephony integration
- 2 days of implementation

Why Choose the UC Enterprise Appliance?

- Simple 2-day installation performed by MOC experts.
- Maintenance performed remotely by StartReady engineers.
- You have complete control of setup and usage.
- Much lower total cost of ownership.
- A completely scalable solution with none of the headaches.

From Pilot to Purchase

After the initial pilot, the pilot program fee of \$6,999 will be applied towards the full purchase of the appliance and related licenses.
