LT-82-03 (Euro)

The Listen LT-82 is the heart of a stationary IR listening system. It takes the desired audio signal and transmits the signal via coaxial cable to one (1) or more IR radiator-emitters (LA-140). The LT-82 can be operated in mono or stereo on one (1) of four (4) different carriers; up to four (4) LT-82 units may be connected to provide up to four (4) mono or stereo carriers to the radiator(s). The LT-82 generates DC power to power up to two (2) LA-140 radiator-emitters. Two (2) LT-82 units can be rack mounted in a single rack space using the LA-326 rack mounting kit. The LT-82 is used for government compliance (such as ADA), assistive listening, language interpretation, live theatre, houses of worship, courtrooms, secure rooms and for auditory description.

Highlights

- Secure wireless communication - ideal for applications where isolation of the signal is important.
- Up to four (4) channels mono, or four (4) channels stereo – no need to sacrifice multiple channels to achieve stereo transmissions (one LT-82 is required for each channel).
- Transmitter can power two (2) radiator/emitters (LA-140) using CAT-5 cabling.
- Easy to specify, install and use.
- Outstanding performance - ensures crystal clear sound for listeners.
- Limited Lifetime Warranty.

Frequently Asked Questions

- Q** How many carriers does the LT-82 produce?
A One.
- Q** How many carriers can be produced simultaneously in a room?
A Four. You will need one (1) LT-82 per carrier.
- Q** How do you interconnect multiple LT-82 units?
A Units are daisy chained using a short piece of coax cable (supplied with each LT-82).
- Q** Is there any performance degradation in stereo mode?
A Yes, stereo operation raises the noise floor slightly.
- Q** Can I operate some channels in mono and others in stereo?
A Yes.
- Q** How many radiators does the LT-82 power?
A The LT-82 powers up to two (2) Listen LA-140 radiators.
- Q** How are radiators connected to the LT-82?
A The carrier (signal) is connected using coax cable; power is connected using standard CAT-5 cabling.
- Q** Can the LT-82 be operated on 230 VAC?
A Yes, the LT-82 has a universal power supply that can be used anywhere in the world.
- Q** What happens if the radiator power cable is shorted?
A To protect the system, the LT-82 will shut down the power to the radiator cable until the problem is eliminated.
- Q** Can I use the LT-82 with other manufacturers' radiators?
A Yes, but the LT-82 will not power those radiators.
