

Adoption & Change Management

The people side of technology.

Microsoft 365 & Teams Adoption Workshop (2 Half-Day Strategy Sessions)

Your adoption team may be made up of several groups including administrative, executive, training, and IT leaders who often times find themselves overseeing multiple initiatives in conjunction with the organization's user collaboration systems.

The Microsoft 365/Teams Adoption Workshop is a competency program remotely conducted by one of our Adoption & Change Management (ACM) advisors over the course of a 2-day window.

Throughout the course of this workshop, your adoption team will cover:

- **Envisioning** the technologies, challenges, benefits, and the way ahead
 - **ACM** Define the methodology of how we assess the scope of the change
 - **Outcomes** Gain insight into the business impacts and difficulties
 - **Champions** Learn why Champions are essential in your organization
- AND MORE!**

Without trust we don't truly collaborate; we merely coordinate or, at best, cooperate.

It is trust that transforms a group of people into a team.

Stephen N.R. Covey

Schedule now. Your adoption team will be provided with:

- Essentials Roadmap
- Device Strategy Report
- Customized Recommendations

\$4,800 per workshop
