

logitech®

DESIGNED FOR BIG ROOMS AND SMART MEETINGS.

Logitech SmartDock Large Room Package for Skype® Rooms

Microsoft® and Logitech® have collaborated to revolutionize the Skype for Business experience and bring it to every meeting space. This Large Room package is a complete Skype Room solution, including the Logitech SmartDock + Extender Box, Logitech GROUP + Extender Mics, and Microsoft Skype Room System.

Transform larger meeting spaces with a rich, collaborative Skype for Business experience that is simple to use, deploy, and manage. With one-touch join, it is easy to both project

to the display in the room and share to remote participants via their Skype for Business clients on smartphones or laptops. Replace the conference room phone with video and voice conferencing and calling. Additionally, IT Admins can easily deploy and manage the locked-down UWP Skype Meeting app via familiar tools built for Windows 10, such as SCCM and Intune. Simply walk into a conference room and start your meeting with a single touch.

FEATURES AND BENEFITS

- Complete Skype Room System in a single package
- Logitech® SmartDock enables a secure premium AV Control Console with built-in content sharing up to 1080p60
- Logitech® SmartDock Extender Box provides a clean and streamlined installation for larger rooms
- Logitech GROUP + Expansion Mics delivers full HD video and exceptionally clear audio for rooms up to 28'.
- Skype Meeting experience is optimized for rooms with screen-filling HD video and HD wideband audio
- Leverages existing meeting room equipment including HD displays and projectors

LOGITECH SMARTDOCK + EXTENDER BOX

Logitech® SmartDock is an AV Control Console that revolutionizes the Skype® for Business collaboration experience. Simply walk into a conference room and start your meeting with one-touch join.

Designed in partnership with Microsoft®, SmartDock enables expanded I/O for Surface™ Pro 4 that includes support for dual HDMI displays, three USB 3.1 ports and Gigabit Ethernet, allowing the IT administrator to connect recommended devices, such as Logitech® ConferenceCams. An embedded motion sensor activates the system when anyone enters the room. Content sharing from a laptop is a snap with 1080p60 HDMI input and capture. With the included extender box, a single 5M cable with HDMI, USB, LAN and power provides a clean and streamlined installation. The extender box eliminates the need for a separate GROUP hub and power brick, providing a clutter free and clean conference table.

The pivoting, cast-metal base provides enhanced security for Surface™ Pro 4. The combination of tamper-resistant screws and a Kensington® security slot helps ensure that the tablet is always in place and ready for your meeting.

LOGITECH GROUP

Designed for mid to large size conference rooms, Logitech GROUP delivers razor sharp video and a beautifully designed full-duplex speakerphone. It delivers an outstanding collaboration experience that's so awesome everyone can be seen and heard. Just use the state-of-the-art speakerphone with a Bluetooth®-enabled mobile device for great-sounding audio calls.

USB plug-and-play connectivity makes GROUP a breeze to deploy and use. It even works within your own familiar computing environment with any video conferencing software application—including the ones you already use.

Expansion mics expand the conversation to 28" so that even those away from the speakerphone can be clearly heard.

High bandwidth audio reproduces vocal tones with exceptional quality, enabling people on both sides of the call to enjoy a life-like communication experience

HD 1080p video quality at 30 frames-per-second brings life-like full HD video to conference call, enabling expressions, non-verbal cues, and movements to be seen clearly

90° field of view with mechanical 260° pan and 130° tilt enhance collaboration by making it easy to see everyone in the room
